

Breez Bot is a multi-purpose bot used to create custom versions. It includes 20 default features that cover most of the typical needs of a broadcaster (tipmenu, notices, room control, etc) and has over 25 extras and games available. Everything in the bot can be modified and customized and totally new sections and features can be created for specific custom versions.

Breez Bot is available both in the V1 and V2 platforms with the V2 having the newest and most advanced features and V1 a more extensive list of extras available (due to its longer life). The number of extras of the V2 version is expected to increase as development continues.

The cost of a customization of this bot is 900 tokens for the V1 version and 1000 tokens for the V2. The price includes any number of menu items and rotating notices. The number of clubs (2) can also be increased up to 5 with no additional cost. In the V1 version the Secret Show section can be replaced by a Ticket Show.

Add-on Name	V1	V2	Description
<b>Ticket Show</b>	✓	✓	Includes Dream Ticket app in the bot (uses the panel if you also include Dream Goals or Lovense Dream).
<b>Tip For Answer</b>	✓		Set up a list of sexy or personal questions and allow your users to reveal the answers privately with tips.
<b>Tip Magic</b>		✓	Displays magic after big tips. Different effects available: hearts, snow, classic rain, etc.
<b>Tip Menu 2</b>	✓		A second menu (the main one just cloned and with a custom title and command to make it different).
<b>Tippers Levels</b>	✓	✓	Adds custom icons/emojis and text/background color to user messages, depending on their total tips during the day.
<b>Token Keno</b>	✓	✓	Classic Token Keno app including all features (group number, multiple numbers from one tip) + nice icons.
<b>Token Poll</b>	✓	✓	The classic Poll bot with added commands to edit polls live.
<b>Token Raffle</b>	✓	✓	Classic Raffle feature that allows users to buy a different number of tickets and can save purchases through different days.
<b>Token Raffle Levels</b>	✓	✓	Combines the Token Raffle with a Fan Club feature, offering different ticket bundles that grant users icons, depending on the amounts they tip for (e.g. 1 Ticket for 25tk = Fish, 10 Tickets for 200tk = Dolphin).

Add-on Name	V1	V2	Description
<b>Wish List</b>	✓	✓	A list of wished items displayed in the room with progress status. Users can donate for the one they want.

The cost of these add-ons typically ranges from 150 to 350 tokens. Dream Goals and Lovense Dream are the only exceptions and have a cost of 500 tokens each.

If you want an add-on that is not yet available in the V1 or V2 platform you can order a conversion. This has a higher cost than just adding a pre-built module but the result will be exactly the same and still cheaper than writing the feature from scratch.

Note also that adding Dream Goals or Lovense Dream to your bot, the application will act like an app, using the room panel when available.
